REASONS FOR ALLOWANCE

1. This Office Action is responsive to the Amendment filed on 01/19/05.
2. Claims 1-8, 10-13, 18 and 21-23 are allowed.
3. The following is an examiner's statement of reasons for allowance:

-Regarding to independent claim 1, none of prior art of record teaches or suggests a method wherein the method comprises, in combinations, procedures of summing data vectors for each symbol in a plurality of superframes; determining the summed data vector having the largest magnitude; and indicating the superframe boundary at the symbol position correlating to the largest summed data vector.

-Regarding to independent claim 10, none of prior art of record teaches or suggests a method wherein the method comprises, in combinations, procedures of determining a summed vector having the largest value; identifying the position of a synchronization symbol in a superframe from the summed vector, and aligning the symbols of each modem of plural modems based on the position of the synchronization symbol.

-Regarding to independent claim 18, none of prior art of record teaches or suggests a system as claimed. Reference Sand et al (6,134,283), previously cited, fails to teach the limitation "the symbol position having the summed data vector with the largest value is the synchronization symbol position". It would not have been obvious for one skilled in the art to implement Sand et al in view of other prior art of record in order to make such an implementation leading to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
